

Victorian Landcare Grants

The annual Victorian Landcare Grants support Landcare and environmental volunteer groups and networks to deliver on-ground works, education and capacity building projects to protect and restore the environment.

2023 Outcomes*

216 Projects delivered outcomes included protecting threatened species and habitat, revegetating and controlling weeds, reducing rabbit numbers and engagement and education to connect communities with nature

Value for money the Victorian Landcare Grants leveraged **\$7.5 million** (2022 funding) through in-kind volunteer and staff hours, project support and financial co-contributions, on top of the **\$3.38 million** invested by the Victorian government

14,145 people participated in 620 community events e.g. workshops, field days, and demonstrations delivered as part of grant projects

376 Artificial habitats or nest boxes installed for species such as gliders, owls and phascogales

* total figures include projects funded in previous rounds, but completed in 2023

Biodiversity 2037 Plan

26,265 Ha of land improved (14,839 MCGs) including:

440 Ha of habitat protected by **83.5 km** of fencing

1126 Ha Revegetation

24,700 Ha Herbivore Control

3591 Ha Weed Control
